

# Three cheers for New Belgium Brewing.

## Food Engineering's Sustainable Plant of the Year for 2010

Wind-powered brewery? Yes. Their own water treatment facility that co-generates energy from methane gas? You bet. Plus 870 rooftop solar panels, 1% of annual revenue to environmental causes, a new custom cruiser bike for each employee's first anniversary, and more.

New Belgium's commitment to great beer—and a better future—is clear. We're glad we could help.
